# Women of Province Have Power to Speed Up Prosperous Times

## Unemployed of Alberta Could Be Absorbed Into Useful Occupations if Housewives Insisted on "Made in Alberta" Necessities of Life

Viking, Nov. 17th.  
At a largely attended meeting in the Elks hall last Thursday afternoon, the whole project of speeding up the wheels of industry in Alberta and consequently putting many idle hands to work, was outlined by Mr. McKay, secretary of the Retail Merchants' Association of Alberta. Via a number of the whole scheme was to buy more made in Alberta goods, and a scheme as outlined by the speaker was simple enough when the necessity for it was figured he quoted in regard to the amount of goods that are shipped in to Alberta that are made just as good, and in many cases much better, right here in our own province.

Mr. A. G. Andrews, M.L.A., for this constituency, was the first speaker, who stated he was pleased to be at a gathering that had for its object the solution in some degree at least to the depression problem, and he was willing to assist in any way possible. Mr. McKay spoke of the part the public could play in the return to prosperity in Alberta and asked for wholehearted support of the women, as statistics proved they do 82 per cent of the purchasing.

A few of the instances cited by Mr. McKay were: Less than 50 persons are engaged in the manufacture of wool hose and knit goods in the province, and that 1,000 could be employed if Albertans were to demand made in Alberta goods. The dyeing of one industry into another was stressed, as for instance, the wool to supply material for hose and knit goods would warrant a spinning mill to use the fleeces from Alberta sheep, and other subsidiary plants would be a natural sequence.

Candy consumption served for another illustration. Eight million loaves are used in Alberta each year, and only half a million are made in our province. One can easily imagine to some degree the quantity of sugar, butter, etc., that would be required to make even half this candy in the province. The making of men's hats, dress suits and coats, floor and by-products, all came in for the same comparison.

There are over 8,000 people unemployed in the province and perhaps as many more not registered. These could all be absorbed into the making of goods, stated Mr. McKay. And it could be easily seen that there was a great deal of merit in what the speaker outlined during his interesting discourse.

An attractive display of 50 manufacturers of Alberta-made goods adorned the stage of the hall for the revelation to the majority of the audience, and it was only indicative of

# I AM THE FARMER

(Contributed)  
I am the provider for all mankind. Upon me every human being constantly depends.  
A world itself is built upon my toil, my products, my honesty.  
Because of my industry, my country is among the leaders of the world: Her prosperity is maintained by me; her great Commerce is the work of my good hands; her "balance of trade" springs from the furrows of my farm.  
My reaper brings food for today; my plow holds promise for tomorrow.  
In war I am absolute; in peace I am indispensable—my country's surest defense and constant reliance.  
I am the very soul of Canada, the hope of a race, the balance wheel of civilization.  
When I prosper, men are happy; when I fail, all the world suffers.  
I live with nature, walk in the green fields under the golden sunlight, out in the Great Alone where brain and brawn and toil supply mankind's primary need. And I try to do my humble part to carry out the great plan of God.  
Even the birds are my companions; they greet me with a symphony at the new day's dawn and chum with me 'till the evening prayer is said.  
If it were not for me the treasures of the earth would remain securely locked; the granaries would be useless farms; man himself would be doomed speedily to extinction or decay.  
Through me is produced the energy that maintains the spark of life.  
I rise with the early dawn and retire when the "chore" of the world are done.  
I am your true friend.  
I am the Farmer.

## DR. HUGH DOBSON DELIVERS INTERESTING AND ILLUMINATING ADDRESS

Viking, Nov. 17th.  
Dr. Hugh Dobson, associate secretary of the Board of Social Welfare and Evangelism of the United Church of Canada, gave a lecture on "The Christian World Order" in the United Church last Friday evening. Dr. Dobson divided his time into two divisions. In the first part he discussed the work of the board and gave an analysis of the meaning of the term "evangelism" and told how the church through the medium of remedial homes, old people's homes, hospitals and relief work, was assisting other large organizations of a similar nature to relieve and cure many of our social ills.

Dr. Dobson gave an analysis of the various causes of unemployment and also outlined possible cures for this condition. He gave an outline of the benefits and ills of capitalism, showing especially how a competitive system such as we have had for so many years had finally created a condition of paralysis in international trade which was in large measure responsible for the present economic depression.

Dr. Dobson's lecture was perhaps one of the most illuminating and thought-provoking discourses heard in Viking for some time.

## DO YOU REMEMBER WHEN—

—A. Oldham returned with his bride from the East?  
—Mr. and Mrs. J. P. Hardy motored to Wainwright in a record time of 1 hour and 15 minutes—July, 1913?  
—J. H. Elliott attended the Calgary fair with a herd of Red Poll cattle, winning \$300 in prize money?  
—N. McDougal lost his stable, buggy shed, buggy, cutter, etc., by fire?  
—A. A. Dickson, was engaged in the hardware business?  
—J. H. S. Armstrong was appointed a commissioner for taking affidavits?  
—The board of trustees of Irma S.D. No. 2435 was authorized by the Minister of Education to borrow \$1,000 to erect a school building?  
—Tom Woods was overcome by gas while boring a well at the J. C. Stock Ranch?  
—"That problem you helped me with last night was all wrong, daddy," said a local schoolboy to his father yesterday. "All wrong was it? Well, I'm sorry," his dad replied. "Well, you needn't worry about it. The boy said, 'for none of the other daddies got it right, either.'"

## First Canadian Legion Armistice Dance Success

This dance, under auspices of the Irma branch of the Canadian Legion, was the first of its kind held in Irma and was generously attended by the public, the attendance being almost a record one, and one of the most jolly and orderly dances held here for a long time.

Supper was served by the Ladies Auxiliary of the Legion, and there was lots to eat for all and coffee to spare. Coulman's orchestra surpassed itself for this occasion, serving up better music than ever—some of the dancers knew the words a fan sang to, finishing about 3.15 a.m. with "God Save the King."

As a result of the congratulations given the Legion, they and the orchestra have promised to try and make this dance next year better than ever, so we will wish all concerned the best of luck.

# "Curly Kid" Kayos Taylor Bowlby; George McBain Gets Broken Arm

## Kid Dawson Wins Over Cyclone Fiddler at Edgerton— Rudolph Mix Issues Challenge to Curly Kid, Who Accepts

A boxing tournament was held at Unity, Saskatchewan, on November 17th, when Curly Kid Archibald followed his usual route by again kaying Taylor Bowlby in the first round of the bout. This was a return engagement and Bowlby's second defeat at the hands of the Curly one.

George McBain, who is a clever and promising boxer, met with a sad accident while fighting a catch-weight match by breaking his left arm in delivering a left hook to his opponent's head. He is now to be seen with his arm in a sling and wishing to be active again. Tuff Luck, George!

Last Tuesday the fighting boys of Irma invaded Edgerton for a series of boxing bouts, featuring Curly Kid, Red Larson and Kid Dawson. At 8.30, Kid Dawson shook hands with Cyclone Fiddler and proceeded to end the bout in the second round with a

## Public Showing Interest In Armistice Services

The annual Armistice service held by the Irma branch No. 112, Canadian Legion, B.E.S.L., in Kiefer's hall on November 11, was largely attended by the public again, who seem to be showing increased interest in these services.

The service was opened by Rev. M. Geeson with prayer, and O Canada was sung. A short poem entitled "Cease Fire" by Mrs. S. L. Scott was read by Mr. Geeson, then the bugle sounded the "Cease Fire," followed by the two minutes' silence and the "Last Post."

Ex-nursing Sister, Mrs. Adams, placed the wreath and the Rev. Mr. Taylor gave an inspiring address, which was attentively listened to by all present. The Girl Guides of Jarow, under the leadership of Mrs. Comley J., attended the parade and service. Comrade, President C. R. Jackson, had charge of the parade and accompanying Sister, Mrs. Bert Long, sang the hymns. The hymns were shown on the sheet by lantern slides, managed by Mr. E. Carter. The hall was suitably decorated and this impressive service was ably conducted by those in charge.

## Bruce Memorial Service Credit to Sponsors

Bruce, Nov. 14.  
The Memorial Service on Armistice Day, arranged by the Bruce Women's Institute, held the attention of the entire district. The capacious community hall was well filled with an appreciative audience, making the affair a credit to those responsible.

The service was in charge of Rev. W. Carmichael of the Free Methodist church, while Rev. H. Bosworth of the United Church delivered an inspiring address. At the close of the session, Rev. A. S. Stambaugh, veteran minister of the district, pronounced benediction.  
Rev. Carmichael, in the capacity of chairman, made reference to the meaning of the remembrance service, and incidentally let his hearers know how the service was affected by the observance of Armistice Day, referring briefly to the loss of a brother in the Great War.

Rev. Bosworth conveyed a message of the churches on the subject of war and peace; and proceeded to outline the best uses of the heritage left at the expense of so many lives.

## Bruce Resident Receives Photo of Liberal Chieftain

Two weeks ago John McIntyre, a respected Bruce resident, who maintains a wonderful vigor of body and mind at the advanced age of 84 years sent as a memento to the Hon. Mackenzie King, a staff of diamond willow, beautifully hand carved and polished. Now Mr. McIntyre, who is a life-long supporter of the Liberal party, is the happy recipient of the following letter of appreciation from Mr. King, accompanied by an autographed photo:

Laurier House,  
Ottawa, Ontario.  
October 21, 1932  
Dear Mr. McIntyre:  
I was greatly pleased to receive on Monday last the diamond willow staff which came from Kilehaman Lodge with your greetings and good wishes. I feel much honored to have received from one of your years an expression of support and confidence such as that contained in your letter, and of which the staff is a fitting symbol.

Your gift, coming as it did, on the day of my reply to Mr. Bennett's motion to approve the trade treaty between Canada and Great Britain, will always be associated with the historic debate which is now in progress, and which I regard as one of the most important which has taken place in our House of Commons.  
The staff itself evidences much skill in craftsmanship. The diamond shaped willow is something wholly new to me, and I am glad indeed to have a sample of it from the Province of Alberta to show to my friends.  
Eighty-four is a great age to have attained, and I am delighted to receive from your handwriting and the tone of your letter that you apparently continue to be in the best of health, and retain much of the spirit of your youth. I hope this may be the case for years still to come, and that Time and Care will continue to deal gently with you.

Under separate cover, I am sending you an autographed photograph which I shall be pleased if you will accept with my best wishes, and the expression of my very high regard.  
With renewed thanks for your welcome and historic gift, believe me, Yours very sincerely,  
(signed) W. L. Mackenzie King.  
John McIntyre, Esq.,  
Kilehaman Lodge,  
Bruce, Alberta.

## ANGLICAN CHURCH

The next church service will be held in the United Church on Sunday, November 27. All W.A. members are asked to attend as corporate communion will be held.

The W. A. Meeting will be held at the home of Mrs. G. H. Gibson on December 6th.  
A tea and sale of home cooking will be held at the home of Mrs. P. Jones on November 26th.

## CARD OF THANKS

The Irma branch of Canadian Legion, B.E.S.L., No. 112, wishes to thank the public for the interest shown in the Armistice service, and for their generous support at the dance in the evening, and will continue to try and hold the interest of the public and gain their support in anything undertaken by the Legion.

W. E. INKIN, Secy-Treas.

## FORTY-FIVE YEARS OF PROGRESS

A forgotten artist, too modest to sign his name, and a second-hand dealer form the strange combination that brought to light one of the best examples of the growth of Canada's trade with the Orient. Forty-five years ago the first ship ever to fly the house-flag of the Canadian Pacific, a flag that has since found its way into practically every port in the world, set out from Port Moody, B.C. She was the barque-rigged steamer "Abyssinia" and, such a marvel was she that the modest artist referred to transferred her graceful shape to canvas with painstaking detail.  
Another artist, chancing upon the picture, imposed it upon a photograph of the latest Canadian Pacific ship, the magnificent Empress of Japan. They are shown above in exact proportion as they would have appeared passing each other on the broad wastes of the Pacific.  
Some idea of the development of shipping in the 45 years may be gained by a comparison. The "Abyssinia" was 363 feet six inches long, 42 1/2 feet wide, had a tonnage of 3,376 and a speed of 15 knots. The Empress of Japan is 670 feet long, 97 1/2 feet wide, has a tonnage of 25,000 and, during her record-breaking passages between Vancouver, Victoria, Yokohama, Shanghai, Hong Kong and Manila has developed as high as 23 knots—more than half as fast again.  
A strange coincidence is that the "Abyssinia" was chartered from W. G. Pearce, who later became the Fairfield Shipbuilding Company which famous Clyde-built shipyard built the Empress of Japan 20 years ago.

## WHEAT POOL MEETING NOV. 22

The annual meeting of the Alberta Wheat Pool, designated will be held in Calgary commencing Tuesday, November 22. The business of the sessions will include the reception of reports covering last year's business, the formulation of plans for the future, the election of directors, etc. The annual meeting is always one of great importance.

"Fresh from the Gardens"

## Monetary Systems.

Individuals the world over have always discussed money. They have always been interested in money. But the vast majority of people in years gone by never bothered their heads very much about monetary systems, and how they worked. They knew that their country was on "a gold standard," but they did not trouble to find out and understand just what that meant. They knew that Governments and banks issued paper bills and that these bills were money. But the main thing one and all were concerned about was how many of these bills they could get in return for the products or the services they had to sell, and how far those same bills would go in buying the goods or services they found it necessary to buy. Of the system behind the issue of these paper bills the average person knew little and cared less.

Today this indifference has disappeared like so many other things in this rapidly changing world. People are still interested in money, how to get, how to spend it, and what it will purchase for them. But they also want to know all about the system back of the issue, circulation, and exchange of money. The people of the world have been awakened with a jolt to a realization that the monetary system is not working as it should work in the interest and welfare of mankind, and we hear the opinion expressed on every hand that money has become the master and not the servant of mankind; that instead of remaining a mere convenience in order to expedite the exchange of the world's commodities and services, it has itself become a commodity; and, that being the case, the people want to know who controls the production of that commodity—money.

As a result of this aroused interest, everybody is talking about monetary systems. People are debating the subject whether they understand it or not. The number of theories, opinions, suggestions advanced are legion; they far outnumber all the monetary and banking systems of the world. Much of what is said, and is even being soberly advanced as a panacea for the world's ills, is based in the most profound ignorance. The "cures" being offered would prove far worse than the disease they would seek to overcome.

Out of the confusion of ideas and suggestions and so-called solutions, one thing emerges. It is this: That no one nation can of itself remove the cause of its financial embarrassment and cure the malady from which it is suffering. There may be persons who honestly think that their pet theory will work where all others have failed; that a nation can, of itself, remedy its own ills, and that even a subordinate state or province within a nation can do so, but all history proves the fallacy of any such notion.

In our dilemma, the safe thing to do is to take a middle course,—not to take the dictum of the banker on the one hand, nor the theories of the radical on the other hand, but rather to weigh well the opinions and advice of impartial students of world economics, men trained and having experience in the weighing of causes and effects, men who have no axe to grind, but who desire that solutions be reached based on solid facts and economic truth.

There are such men in most countries, and outstanding in this group in the world today is Professor Gustav Cassel, of Sweden. He is an originator, not merely an exponent of a great deal of modern economic thought. His counsel has been sought by central banks in many countries, by governments and by the League of Nations. His opinions cannot be lightly dismissed. He was invited to deliver the Rhodes Memorial Lectures this year at Oxford. There were three lectures dealing with the gold standard and the break-down of the world's monetary system. These lectures have now been published in book form.

One Canadian reviewer of this book says that Professor Cassel mines no words in these lectures. There are none of the cautious phrases and complicated qualifications to which one is accustomed in the writings of economists. He speaks as one having authority and evidently considers that his subject has been carried beyond the bounds of controversy. Professor Cassel first shows that gold has ceased to impart value to money and that its automatic regulation of the value of money has given place to bank policy as a means of regulation. "For a true understanding of the monetary system," says Professor Cassel, "it is of fundamental importance that we should make ourselves familiar with the fact that a national currency never is anything else than a paper currency and that the maintenance of a gold standard only means that this currency, by a deliberate monetary policy, is kept in a certain parity with gold." He goes on to show that the value of gold itself is then determined by the monetary policy of the leading gold country, and he lays the blame for the great fall in world prices upon the monetary restriction policies of France and the United States.

Professor Cassel pokes fun at the apocryphal old gentlemen who will not entertain the notion of a "managed money" and talk largely about "sound money," by making it absolutely clear that we already have a managed money. In fact he attributes a great deal of our grief to the fact that not only is our money managed, but that it has been very badly managed. After pointing out the amount of intelligent co-operation that is needed to make even a reformed gold standard work, he concludes that gold must, in the circumstances, be regarded as singularly unsuitable for use as a standard of value.

Professor Cassel complains of the loose and unintelligent use of the word inflation, which does not mean what the pious think it means. An expansion of the legal basis for money does not necessarily involve inflation. Anyhow, he thinks that some inflation would be a good thing. "The best thing that the gold standard countries could do," he says, "would be immediately to start an inflation of their currencies." Remember, it is no crank who proclaims this, but one of the world's leading authorities, a mature man, and one whose influence has been established and proven.

His views, as set forth in these lectures, may well receive the close study and consideration of all would-be monetary experts, currency reformers and re-organizers of our banking system. They may find comfort and support in some things, but they will also be steered away from many of the untried theories they are now advocating and which this world authority exposes as utterly unsound, and which, if put into practice, would bring disastrous results.

A correspondent says that when he takes his wife to a football match she shouts his speeches. Now, that's an idea.

Try Lydia E. Pinkham's Vegetable Compound

**Cried Herself to Sleep**  
All worn out... splitting headaches make life hideous every day. She needs a tonic... Lydia E. Pinkham's Vegetable Compound relieves cramps.

W. M. H. 1907

## Japan and Britain

London Mail Is Opposed To Any Anti-Japanese Proceedings.

On behalf of this country it should be clearly stated and generally recognized that we do not mean to be involved in any anti-Japanese proceedings. The British nation will have nothing to do with such criminal lunacy. It regards Japan's presence in Manchuria as being as natural and salutary as that of Britain in India or Egypt.—London Daily Mail.

In the five years 1927-1931 inclusive the production of bicycles in Canada totalled 131,285, valued at \$3,676,365. There are three plants engaged in the industry.

## Canadian Theatres Safe

Have Highest Rating in Respect To Fire Risk

Reports from Ottawa show that the theatres in Canada now have the highest rating in respect to fire risk of any property. This fact was brought out in the report just issued by J. Grove Smith, Dominion Fire Commissioner.

The report further shows that there were only 16 fires in theatres in the last year and not one of them of a serious nature. The total fire loss was only \$4,200.

The report gives high credit to the type of men engaged in the business of managing theatres in the Dominion. Mr. Smith stated that nowhere in the world did the managers take the precautions to safeguard their patrons as in Canada and particularly in Ontario. When one stops to think that over 3,000,000 feet of film was shown in the close on to a thousand theatres in Canada last year this small fire loss is remarkable.—St. Thomas Times-Journal.

## HAD RHEUMATISM FOR 20 YEARS

But None Since 1930

This man must have something like a record for suffering. He says:—"Since 1910 up to 1930—that is 20 years—I have been a great sufferer with rheumatism. I am pleased to say that since 1930 up to date, I have been free from that dreadful pain, simply by taking Kruschen Salts—and nothing else. I must say that 20 years is a long time to have that awful rheumatic pain about one."—W. P. Your rheumatism is just like his and everyone else's. It is caused by sharp-edged acid crystals getting into your joints. Kruschen will dissolve those crystals away. Furthermore—if you keep up the "little daily dose" ever afterwards, it will never be possible for them to form again. Rheumatism will be gone for good.

## Pays Fine Tribute

French Premier Pays Homage To German War Dead

Premier Edouard Herriot, of France, paid tribute to the German war dead in an address dedicating a new municipal hospital.

"Here in Lens," Herriot said, "sleep 75,000 German war dead who were undoubtedly men asking only to live in tranquility. Let us confer on them the homage that we have conferred on our own dead. France has not hatred for her former enemies. What our country wants is a plan for pacific organization which will obtain from everyone, a renunciation of arms."

## THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile

—Without Calomel  
You are "feeling punk" simply because your liver isn't pouring its daily two pounds of liquid bile into your bowels. Digestion and elimination are both impaired, and your entire system is affected. What you need is a liver stimulant. Some of the best are: laxative candy or chewing gum or roughage which only move the bowels. Try Liver Pills. Purge the real cause of trouble, your liver. "Take Liver Pills. Purge the real cause of trouble, your liver." No harsh calomel (mercury). Safe. Sure. 25c. at all drug stores.

A total of 544,129 radio receiving licenses have been issued by the Canadian Government Radio Branch from April 1 to September 30, 1932, or approximately one to every eight persons of the population of the Dominion.

To safeguard the child from damage that worms cause, use Miller's Worm Powders, the medicine par excellence for children. These powders will clear the system entirely of worms, will regulate and stimulate the organs injuriously affected by the worms, and will encourage healthful operation of the digestive processes. As a vermifuge it can be relied on for its effectiveness.

Thefts of church poor boxes in London are more numerous than ever.

Scotland has many mysterious deaths.

## Easy Teething

"Baby cut all his teeth with no trouble, thanks to BABY'S OWN TABLETS," writes Mrs. Thomas Shaw, Hamilton, Ont. Scores of other Mothers have written in similar vein. Give your child BABY'S OWN TABLETS for teething troubles, upset stomach, simple fevers, colic, colds, constipation, sleeplessness, or whenever he is cross, restless and fretful. Easy to take as candy, and absolutely SAFE—see analyst's certificate in each 25-cent package. Over 1,250,000 packages sold in 1931.

Dr. Williams' BABY'S OWN TABLETS

**muddy skin**  
Act at once! Incomplete elimination is poisoning your blood. Take Eno every morning.

**TAKE ENO'S FRUIT SALT**

## U.S. Bank Failures

Can't All Be Blamed On Business Depression Says Investigator

All American bank failures cannot be blamed on the business depression, Dr. Charles O. Hardy, of the Brookings Institute, reported after an intensive survey.

He estimated that in the decade 1921-1931 there were 8,784 bank insolvencies in the United States, or 29 per cent. of the number of banks in operation at the beginning of the period.

Hardy blamed "the inherent banking instability" on:

"The whole system of pyramiding a vast array of obligations which technically or practically, are payable on demand on a slender basis of cash and an even slenderer basis in the form of stockholders' equity. This dependence for solvency is placed on assets which can only be liquidated by transfer or by wholesale destruction of monetary values."

He concluded his survey with the assertion that "while the United States is not the only important country in which banks become insolvent, it is the only one in which they are allowed to fail."

## Recipes For This Week

(By Betty Barclay)

### TAPIOCA CREAMED SALMON

1/2 cup milk  
1/2 cup water.  
2 level tablespoons quick-cooking tapioca.

1/2 cup salmon.  
1 tablespoon butter.  
1 egg (if desired).  
Salt and pepper.

Heat the milk and water in a double boiler, add the tapioca and cook for 10 minutes, stirring frequently. Add the salmon, flaked with a fork. Cook for 5 minutes and add butter, seasoning, and egg well beaten. Serve hot on toast, or crackers.

### CRISPY COCONUT PATTIES

1/2 cup condensed milk.  
3 cups shredded coconut.  
1 teaspoon vanilla.

Combine ingredients and mix thoroughly. Shape into small cakes about 1 inch in diameter and 1/2 inch high. Place on greased baking sheet and bake in moderate oven (350 degrees Fahrenheit) 15 to 20 minutes. Makes 2 dozen patties.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Exterminator.

## War Debt Cancellation

United States Would Profit If They Would Agree To It

Senator Borah estimates that the economic depression has cost the United States \$300,000,000,000 (about \$150,000,000,000). Such calculations are necessarily conjectural, but the loss has certainly been fabulous, and must continue so long as the world's financial machinery is thrown hopelessly out of gear by the attempt to transfer huge payments of war debts. That is at bottom the justification of the seeming paradox that it will handily pay the United States to cancel her war debts.—London Daily Telegraph.

Water Collected From Air  
By a new method drinking water is collected from the air in Southern France. A large, round pillar with a thick outer casing of cement is erected. The water is produced by the difference between day and night temperature forcing the air down pipes in the pillar, where it condenses and falls into a reservoir.

A great proportion of our food consisting of starch, fat, and protein is said to be entirely tasteless.

Life insurance policies in Norway are more numerous than a year ago.

## Discover, Strange Freak

Mummified Remains Of a Pygmy Found In Wyoming

Wyoming's scientists are pondering deeply over their latest archaeological acquisition, now in the temporary possession of Mrs. Cyrus Beard, state historian. To all appearances the object, unearthed by a gold prospector, is a mummified pygmy or the remains of a child.

The archaeological freak is a human figure, in a cramped, kneeling posture with arms akimbo, somewhat similar to that of the Oriental Buddha.

The strangest feature is its dwarfish size. The figure, sitting upright, measures but six and one-half inches in height. Its weight is about three-quarters of a pound. With the exception of its arms and head, which are rather large, the object is uniformly proportioned anatomically. It has a fringe of silver grey hair at the back of the head and a form of hair over its body.

Cecil Mayne, Alliance, Neb., youth, who was prospecting for gold in the Low mountains, discovered the freak.

## Radio Inspection

Commission To Investigate Radio Properties In The West

Inspection of radio properties in Manitoba and other provinces in the Canadian west by the recently formed radio commission will be started soon, it was learned reliably at Ottawa.

The three members of the commission, headed by Hector Charlesworth, chairman, are expected to reach Winnipeg early in December, and will conduct a thorough investigation of present broadcasting facilities.

The inspection of radio stations and programmes during the western tour of the commission will probably be conducted along two lines, one with the incorporation of western stations in the Dominion-wide radio system in mind.

## More Uses For Rubber

List Is Already Large and Likely To Increase Greatly

Uses of latex, which is the milk of the rubber tree, are expanding steadily. The list is already impressive and doubtless will be much longer in the years just ahead. Latex is appearing in many industries—music, radio, photography, aviation, motion pictures—and even in the manufacture of violins, which are now being made with rubber-impregnated woods. Experiments with latex at Singapore show that it can be applied like asphalt for paving. In England it is used for car seats and is also found to be a satisfactory base for the mohair upholstery in automobiles.

An Oil That Is Prized Everywhere.  
—Dr. Thomas' Electric Oil was put upon the market without any flourish over fifty years ago. It was put up to meet the wants of a small section, but as soon as its merits became known it had a whole continent for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

## New Citrus Fruit

A Florida citrus grower has succeeded, by crossing the Mexican lime and the lemon, in producing a new citrus fruit that resembles the lemon, but resists several diseases common to that fruit.

Japan now has 1,500 movie theatres.

## Christmas in the Old Country

Give the Old Folks the best possible Christmas present by going to see them this year. Enjoy the thrill of doing your Christmas shopping in London, Glasgow or Paris. Low ocean rates still in force.

## Inter-Provincial Ploughing Match Held At Ottawa Was Attended By Thousands Of Spectators

It would seem that the present generation have by no means lost veneration for the oldest of all industries—the tilling of the soil—and a demonstration of how this ancient history should be done in this day and generation can attract crowds as large as attend big league baseball or football games. An inter-provincial ploughing match was held recently at the Canadian Government Central Experimental Farm, on the outskirts of Ottawa, and many thousands attended to watch the competitive events during the four days the meet was held. On the last day more than 10,000 persons were present to see the finish of the final contests, when furrows were ploughed from one end to the other of the large field, as straight as a gun barrel. This ploughing match, which was open to horse and tractor ploughs, demonstrated that the farm horse is by no means on the way to join the Dodo or the Great Auk; indeed, the consensus among farmer folk is that the farm horse is steady plodding his way back towards the plane of his former popularity.

The Inter-Provincial Ploughing match was formally opened by His Excellency the Earl of Beesborough, Governor-General of Canada, who tried his hand at ploughing a long, clean, straight furrow and made good showing for an amateur. The ploughs used in the contests were naturally a substantial improvement on the first cast iron plough made in Canada more than 100 years ago. This distinction of making that implement belongs to Ezerias Parsons, a native of Lisle, Bromes County, New York. In 1834 he moved to Chippawa, Ontario, near Niagara Falls. He was poor, but had an idea that cast-iron ploughs would be more serviceable than those of wood and wrought iron, which were then in general use. He gathered together scrap iron, constructed a rude furnace and cast three ploughs, which proved to be models of lightness and durability. The demand for his ploughs soon became great. In 1837 he died at the age of 38 years. His business was carried on by a Mr. Macklem. In three years Parsons made a net profit on the sale of his ploughs of \$6,000.

### Birds Prove Menace To Sheep

Magpies Destroy Young Lambs In British Columbia

Brutal methods employed by magpies to secure food among the large flocks of sheep and lambs during spring are disclosed by A. Bryan Williams, British Columbia game commissioner, in his annual report.

When the lambs are only a few hours old the voracious magpies pick out their eyes, leaving them blind and helpless to die in agony. Then the birds feast on their young, tender lamb.

Bounties were paid on 3,427 magpies and wardens killed an additional 1,385, a total of 4,812 last year, but the birds do not appear to be greatly diminished in number.

The commissioner recommends the total extinction of magpies and crows, the latter being almost as bad as magpies. Wardens shot 5,700 crows last year, also 51 eagles, 302 hawks, and 130 owls.

Mr. Williams describes wild domestic cats as a real menace. Domestic cats are resourceful in the wilds and quickly learn how to subsist on wild life. Young game birds and chickens fall easy prey to the cats.

### Italian Sailor Was Brave

Saved Submarine Crew With Great Danger To Himself

Sailor Giuseppe Valentano got a silver medal because he thought of others and forgot himself. The submarine N-6, the award disclosed, started to go down with the coming tower off Taranto. Valentano, in the tower at the time, leaped to the deck and closed the hatch, from the outside. He was left adrift in the ocean and was nearly dead when picked up. The submarine later returned safely to the surface.

"What is ignorance?" asked John's teacher.

"It's when you don't know something, and somebody finds it out," came the immediate reply.

Russia's population has grown 3,000,000 in the last year.

The steel industry has developed 1,600 kinds of alloy steel.

W. N. U. 1967

### Receives Faraday Medal

Award Given In London To Sir Oliver Lodge

Sir Oliver Lodge has been fittingly honored by the presentation of the Faraday Medal, which was made at the Institution of Electrical Engineers, in London, England. It was the 11th award of the medal, which was founded in 1921, and was awarded to him in recognition of his distinguished services towards the advancement of science. Sir Oliver remembers hearing Graham Bell when he went over to England with the first telephone and explained it to British scientists, and recounted to the gathering the scepticism it aroused. He is now in his 81st year, having been born at Penkull, Staffordshire, on June 12, 1851.

### Road To Longer Life

Scientist Claims Way To Better Health Depends On Food Values

The newest road to longer life and better health for man leads through his stomach. Latest scientific study of nourishment value of foods show it is possible to extend the average length of life and better health of the human race by improving diet. So Dr. H. C. Sherman of Columbia University told the American Public Health Association.

WHAT NEW YORK IS WEARING (By Helen Williams) Illustrated Dressmaking Lesson Furnished With Every Pattern

Here's a charming day dress following the newest lines made is favouring.

Its simple bodice with slimming "v" neckline has a becoming tie-like trim. Pointed seaming slenderizes the hips. The lower skirt in panels, give decided height to the figure.

Materials such as rough crepe silks, crepe satin and thin woollens are smart and wearable to fashion it.

Style No. 2863 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust.

Size 36 requires 3 1/2 yards of 39-inch material with 3/4 yard of 35-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### Liked Canada's Ice Cream

British People Would Like To Have It Often

Writing in the *Edinburgh Scotsman*, "A Woman Journalist" says it is a pity, with all these negotiations at Ottawa, that something could not be done about ice cream. A friend, just home from Ottawa, tells me that we hardly know the meaning of the words on this side. He gave mouth-watering accounts of the slabs of delectable ice cream which he was served at every meal. Maybe he exaggerated, but it is a much more frequent item on the Canadian menu than it has ever been with us. "And it is real ice cream, mind you," none of your condensed milk mixtures. It is like silk on the tongue, he says, and factory made. At 25 cents a pint, it is a palatable, economical, and nourishing addition to the diet. What I begin to visualize is an ice cream flying corps. Picture a band of girl flyers in white uniforms sailing across the skies in a silvery flying machine, bearing quarts upon quarts of rich ice cream to waiting customers on this side of the water. "They'd eat it all the way over!" suggests someone—an official criticism of a really bright proposal.

### Lives On Lonely Island

Modern Robinson Crusoe Is Discovered Off Chilean Coast

A new Robinson Crusoe, who shuns rescue, has been found on an island off the Chilean coast.

Sailors of the French vessel "Tolosa," who landed on Rinca Island seeking water, said they followed footprints and surprised a man covered with goat skins in a semi-savage manner.

Federico Lavarriere, one of the sailors, tried to talk to him, but he snarled in guttural sounds, as though he had forgotten his language. By signs, the sailors induced him to lead them to a hidden source of water.

On leaving, they invited him to go along, but he took one look at the ship and fled into the bush.

It was on Juan Fernandez Island off the central part of Chile that Alexander Selkirk, the prototype of "Robinson Crusoe," lived.

### Girls Run Irish Factory

Govern Working Conditions and Decide Wages and Hours

The cheerful clack of machinery bids defiance to depression in a Dublin factory, which is run by 170 working girls.

Situated in a humble street, the factory exists only for the manufacture of rosary beads. The proprietor is a grand nephew of the famous Irish patriot and author, John Mitchell.

The business is unique in Ireland. The girls who work in the factory elect a council every year, and they decide wages, hours and working conditions. They know the profit and expenses and they see the books. Each girl has as much of a vote as the proprietor.

The hooves of nearly every head of cattle slaughtered in Ireland come to the little mill in Waterford Street. High speed machinery turns them into the horn beads that have a sale the world over.

Profits are substantial, working conditions satisfactory. The girls say they are happy.

### Alfalfa Makes Good Pasture

Not Necessary For Farmer To Harvest Second Crop

We once heard a man say that he did not grow alfalfa because "it makes too much hay." Sometimes we think he was right. Ordinarily it is a fine thing to get a second and a third cut of alfalfa, but the best hay-making season is over when they come and curing is often a problem.

This year, after taking off 100 loads of hay, we were not at all enthusiastic about a second cut. We had four fields that would have yielded another crop, but only two of them were harvested—the two smallest—and we made ourselves think that the other two were needed for pasture, as indeed they were for the pasture season was only half over at the time. Farmers rarely have too much pasture, and the live stock will usually take care of any second or third cutting that a weary farmer does not care to harvest. Where alfalfa will grow there is no sound argument against it.

### The Pride Of London

Life Guards Have Gone Back To Old Quarters

The Life Guards are once again back at their old barracks quarters in Knightsbridge. They have been stationed there for about 200 years. Tradition was broken the other day when for various military reasons, the Knightsbridge barracks, the oldest in the country, were vacated by the mounted six-foot troopers and taken over by a battalion of Foot Guards. Strangely enough, it has been London's modern traffic conditions that have restored the Life Guards to their old home. They are much closer to Whitehall at Knightsbridge, and their daily progress to and from mounting guard at the old Whitehall tiltyard offers less obstruction to the roaring motor traffic. It is said the orders posted up inside the Whitehall sentry-boxes where the Life Guards mount guard are identically the same as they were more than three centuries ago.

## New Process Being Perfected For Producing Synthetic Lumber Stronger Than Natural Product

### New Style In Eggs

Pure White Shells and Pale Yellow Yolks Now Correct

When we speak of good taste in eggs we usually mean quality, but at least, olfactory taste. But butter and egg men declare the visual taste is the selling appeal in eggs, new-laid eggs, fresh eggs—or eggs. Hens are, perhaps, more concerned than is the public in the announcement that correct style in eggs from the poultry yard this coming winter demands pure white shells and pale yellow yolks. L. B. Kilbourne, president of the United States Egg Men's Association, is quoted as authority for that claim, which makes it evident that esthetic considerations enter into the marketing of eggs. Of course, we Canadians have so many protective laws and inspectors always working that our eggs must be always in good taste for breakfast table manners. At least, legally, no unwarranted egg can enter a home unless duly branded according to class.

Still, we do know where that Chicago expert gets his fashions for hens and their eggs. The egg public is not finicky except about the date of the package. The average egg appetite doesn't go by shells, beige tint, sun tan, or what not. A pallid yolk is not so worrisome as long as the period between the hen and the cup is moderately brief. However, the golden yellow of an egg is rather appealing to even the less dilettante, though a mere egg-eater might not notice the warm pastel shades of the yolk, as it were. Then there is a considerable section of the egg's public with a strong leaning to the belief that stronger coloration of shell indicates richer and more nutritious content.

The cheery persons deny that fancy. At the same time boarding house keepers who have fastidious egg bachelors to satisfy hold their white eggs in coffee and produce the beautiful rich warm tone natural to hen fruit of good taste. Moreover, the average egg consumer will never believe Chicago designers can decree a fashion in eggs despite the depression.—Brandon Son.

### The Pride Of London

Life Guards Have Gone Back To Old Quarters

The Life Guards are once again back at their old barracks quarters in Knightsbridge. They have been stationed there for about 200 years. Tradition was broken the other day when for various military reasons, the Knightsbridge barracks, the oldest in the country, were vacated by the mounted six-foot troopers and taken over by a battalion of Foot Guards. Strangely enough, it has been London's modern traffic conditions that have restored the Life Guards to their old home. They are much closer to Whitehall at Knightsbridge, and their daily progress to and from mounting guard at the old Whitehall tiltyard offers less obstruction to the roaring motor traffic. It is said the orders posted up inside the Whitehall sentry-boxes where the Life Guards mount guard are identically the same as they were more than three centuries ago.

### Canada's Flour Exports

Substantial Increase In Shipments To United Kingdom Is Expected

In 1931 Canada sent 2,225,490 barrels of flour to Great Britain out of a total importation by the British of 6,141,192 barrels. The United States sent 1,187,190 barrels. It is expected that Canada will increase substantially her exports of flour to the United Kingdom.

In 1931 Great Britain imported to the equivalent of 250,466,000 bushels of wheat. With the flour and wheat preference granted through the agreements, the wheat exports from Canada to the United Kingdom are expected to increase by many millions of bushels.

And as the wheat industry is one of the chief keystones of Canadian prosperity, the advantages granted wheat and flour are hoped to prove important factors in the national recovery.

A photograph taken at a recent social gathering in Scotland revealed that only one man was wearing a kilt, and he was an Englishman on his first visit to Scotland.

Nearly 1,000 building permits have been issued in Melbourne, Australia, this year.

Waiting 30 years or more for commercial lumber to grow on the stump is no longer necessary, a report by a professor in Iowa State College to the American Chemical Society says. Any wood that now grows in the forest can be duplicated out of the refuse from American farm crops—corn stalks and cobs, straw and bagasse. The hardest of this synthetic wood, according to the report, closely resembles teak in appearance, as well as in durability, density and strength, while its cross-breaking coefficient is nearly double that of teak and almost equal to that of common steel. Variations of the process of manufacture produce "wood" as light and friable as cork.

One advantage of this synthetic product is that it takes less weeks to produce than it takes years for trees to reach commercial size. Another is that it can be made out of the refuse from food crops. Still another advantage is that lamination synthetic lumber can be molded into various dimensions, which saves labor costs. A house can be built out of this material, says the Iowa professor, at about the cost of one built out of natural lumber and will be stronger and less expensive to heat, a result of its better insulation. The cost of producing the hardest of this synthetic building material however is approximately \$250 a ton, which seems for the time being to place it out of competition with forest products. As timber becomes scarcer and consequently more costly, and the methods of manufacturing synthetic wood are improved and thereby cheapened, this discrepancy in costs may be expected to diminish and ultimately to disappear.

Again chemistry has come to the aid of Nature and man. When the first ax was sunk into the primeval forest of America, a catamount could travel from the Atlantic to the Mississippi without ever seeing the sunlit waste in clearing off the forests—some of it inseparable from the progress of agriculture, some of it unpardonably stupid and unnecessary—threatened to leave the United States with an inadequate timber supply. The slow process of reforestation was resorted to in order to forestall that calamity. The raising of lumber on Western cornfields and Southern canebrakes beats reforestation all hollow.—Detroit Free Press.

### An Aristocratic Horse

Valued At A Thousand Guineas Is One Of Costliest In World

One of the most beautiful, cleverest and costliest hacks in the world is to be seen at the American Horse Show most mornings just now.

This horse belongs to Wilson Cross, chairman of the American Club in London, and president of an oil company. It is a full-manned, full-tailed bright chestnut, six years old, and valued at a thousand guineas, and Mr. Cross has just brought it from the United States, where it has been winning big prizes in a special class unknown to our horse shows.

It belongs to the type that Americans call a "five-paced horse," which means that in addition to the walk, trot and canter or gallop, it has been trained to two special intermediate paces—a walk and a trot in which the legs move all four in sequence instead of as two pairs.

This special gait is taught by American cowboys to their mounts because for long-distance riding it is as easy as an arm-chair, the rider being able to sit still in his saddle instead of rising to the motion of the horse.—London Sunday Pictorial.

### Something To Know

To prevent glass bowl from cracking when hot custard or stewed fruit is poured into it, wring out a large flannel in warm water, fold in two and stand the bowl on this while pouring the hot liquid. Glass jars may be safeguarded when hot jam or preserve is poured into them by the same method. When a number of jars are to be filled a piece cut from a worn blanket is convenient, as it is thick and does not require folding.

### Barter Trading Revived

Revival of old time barter trading with the natives of Africa's west coast is in the making. C. Nelson Rogers, president of the West African Trading Company, announced that the old iron bark "Carlianna," left Boston on November 12, for the Canary Islands and West Coast of Africa, where American goods will be exchanged for domestic products.

## + Do You Know? +

—THAT the relentless force of the Bulkley River in northern British Columbia has cut a channel through a wall of solid rock 150 feet high and 8 feet thick? The Bulkley Gate as it is called is seen in the photograph standing like the uncompleted masonry of man.

## Liberals' New Leader.

Congratulations have been heaped upon W. E. Howson, of Edmonton, since his selection as Liberal leader for the Province of Alberta. These warm congratulations are well deserved and come from men and women in all walks of life. He has been chosen as provincial leader at an age much younger than that at which such a distinction usually comes. The new leader was born on a farm in Peterborough, Ontario, in 1883, making his present age 49. After graduating from the University of Toronto, he came west in 1910, he entered the University of Alberta, from which institution he graduated in 1915, in arts and law. Taking up the study of law, Mr. Howson spent his student days in the office of the late Hon. A. G. MacKay, long a pioneer in Ontario, and later in Alberta politics. During the world war, Mr. Howson enlisted as a private and went on service overseas. He returned from the front and is now at the head of his own law firm of Howson, Duncan, McLachlan & Cross. In 1920 he was elected to the provincial legislature as a Liberal member for Edmonton. He is married and has two daughters and one son.

Mr. Howson is well fitted for the great task before him, full of energy and has those aggressive qualities which arouse enthusiasm for the cause for which he stands.

## TO NORTHERN TRAP LINES

Viking, Nov. 17th.  
G. A. Loade, O. S. Sloan, Bill Smith and Herman Bousquet were Edmonton visitors over Remembrance Day. Two of these boys, Bill Smith and Herman Bousquet, went to the capital city, to Murray where they will establish trap lines. May they have to set them often.

## Kiefer Secures Masterpiece In "Daddy Long Legs"

The screen version of the great book of a generation has been secured by Manager Kiefer for his next all-tackle offering in Viking, Thursday, November 21, and he is to be congratulated on his enterprise in securing, as one prominent critic has declared, a picture greater than "7th Heaven".

This masterpiece is "Daddy Long Legs," with romantic Warner Baxter and Janet Gaynor as the leading stars. Janet, "Dream Girl" of millions of screen fans, whose fragility and amazing artistry is at its very best in this setting. Warner is a popular all-around star who has never failed to give a convincing performance, whose following has constantly grown since the advent of silent pictures. These personalities would make any picture a hit. As it is, with its million dollar stars and superb cast, "Daddy Long Legs" will be a box office riot.

You'll see the strange courtship of a girl who adapts a grown up daughter.

Who is "Daddy Long Legs"? Janet Gaynor wanted to know—so will you.

## OBITUARY OF MRS. HARRIET THOMPSON

One of the pioneers of this district in the person of Mrs. Harriet Thompson passed away peacefully on Wednesday, November 9th. She had been in failing health for years but managed to be about until two weeks ago. She died at the home of her daughter, Mrs. Carr, sixteen miles north of Viking.

The deceased was born in the north of England some 81 years ago, and was married to Mr. James Thompson in 1870. They and their family came out to Edmonton in 1902 and a year later took up a homestead north of Viking. They were highly respected pioneers of this district. Mr. Thompson died about seven years ago. They were people with a strong religious background, and in the early days did much to perpetuate the Christian faith in this community.

The funeral service was held at the Carr home on Friday afternoon, and was largely attended by relatives, neighbors and friends. Rev. Mr. Bain-

bridge gave a very appropriate address, "Aside With Me" and "Near My God to Thee," were the hymns sung. Interment took place at Viking cemetery.

The deceased is survived by one sister, Mary E. Huxley, of London, Ind., and one brother, Wm. Eagle, of Indianapolis, Ind., two sons, Thomas W. Thompson, of B. C., John S. Thompson, of Torrance, Ind., and one daughter, Mary E. Carr, of Rancho, Alta., as well as a large number of great grand and grand children.

Beautiful floral tributes bore testimony to the high esteem in which "Grandma Thompson" was held. Six neighbors were pallbearers: Messrs. B. C. Gilpin, Chas. Rice, S.A. Pace, Sullivan, H. Beamish, and E. Chandler.

## LES CAMARADES TO HAVE PERMANENT CLUB ROOMS

Les Camarades held a regular meeting last night in the town hall at which it was decided that a permanent clubhouse be established at the rear of Brown's Garage. The dance last Friday was a success financially and we take this opportunity of thanking the public for their patronage. The club decided to go in aid of Sunshine from now until Christmas and are asking that the community co-operate with them in an effort to collect clothes. Any donations may be left at C. G. Purvis's office or may be called for by notifying one of the following: R. McAthey, Marjorie Barker, or Bertia McHenry.

Through a typographical error or the poor penmanship of the reporter, it was stated last week that the "Misses" entertained us on November 1st. This should have been the "Nurses".

## LES CAMARADES INITIAL DANCE IS SUCCESS

Playing whist and dancing was the attraction of the Elks Hall on Sunday night. The affair was the initial attempt sponsored by Les Camarades society and proved highly successful. A large crowd turned out and, after cards, stepped the light fantastic in the wee small hours. Much favorable comment was heard in favor of the splendid music provided by the Troubadours orchestra.

## Farmers of Lake Alice Preparing for Winter

Lake Alice, Nov. 14th.  
The farmers have been very busy preparing for winter and it looks as though it has arrived at last. Friday, snow fell all day and the air was quite frosty.

George and Pat Mansell are busy hauling wheat to Minburn.

R. O. Hansen attended the G.W.V. dance at Innisfree on Armistice night and renewed old acquaintances with veteran friends.

Last week being high school completion, Dorothy Hanson and Allen Murphy spent the week end at their homes.

Mr. and Mrs. J. H. Roland and daughter, Florence, made a short visit to the district on Friday.

Mr. and Mrs. Ingrid Leeland returned to their home in Minnesota, taking with them Mr. and Mrs. Verre Bentley and family.

Miss Sadie Kennedy is giving a dance in Lake Alice school, November 25, with Horvick's orchestra. She plans to have home-made candy for sale and is also having a fish pond. The proceeds are in aid of the Christmas fund.

Joe Caldwell was riding the range last week end, looking for stray horses.

Miss Mary Speers visited the Murphy home last week.

## THE CO-OPERATIVE COMMON-WEALTH FEDERATION

This vitally interesting question will be the topic of discussion at a meeting in the town hall, Wednesday, November 23, at 8 p.m.

Members of all U.F.A. locals in the community and other interested persons are invited to be present and take part in the discussion.

## GETTING WHAT THEY ASKED FOR

(The Vegreville Observer)  
Viking farmers meeting last Saturday drew up an imposing list of resolutions to present to the government, federal and provincial. Some of these resolutions are frankly important, others are backed by more than a little reason.

The curious thing about it is that very probably the most of these farmers worked and voted for the election of members; both in the House

of Commons and in the Legislature, whose influence in directing the course of legislation is negligible.

For instance, our Dominion member, Mr. Luchkovitch, might just as well come out himself as a supporter of the R.R. R. B. Bill, set for his whole course in the House since he was elected has been that of support for the Conservative policies. From 1925 to 1930 Mr. Luchkovitch voted steadily with the Conservative Opposition while from 1930 to the present he has announced himself himself up light to the Bennett charter. Yet a fair proportion of the farmers at the Viking meeting worked and voted for Mr. Luchkovitch in 1925 and 1930. Others worked and voted for W. T. Lucas, M.P. for Ontario, whose parliamentary course has been parallel to that of Mr. Luchkovitch.

The Observer suggests that a lot of the farmers are getting exactly what they voted for.

Prague, Nov. 14.  
The recent concert held by the Way Lake Ladies' Aid turned out to be a great success. The entertainment began at eight o'clock with a violin and piano duo. During the intermission a sale was held consisting of many twenty-five cent articles, donated by the ladies, and two complete meals. A mystery room caused much amusement among the young people. Such screams of terror as came from some of the girls really made shivers run up and down your main vertebrae. However, everyone came out with a smiling face. When the concert was completed, a lovely lunch was served and everyone returned home with the feeling that they had received much more than their money's worth. This is a feeling we all like to have nowadays.

The ladies are planning to entertain us again on the twenty-fourth of November. A dinner will be served at noon and will be followed by a concert which was announced as unusual. I am sure everyone will have a delightful time as on the previous occasion. Come and see.

## Prague Ladies' Aid Held Very Successful Concert

Prague, Nov. 14.  
The recent concert held by the Way Lake Ladies' Aid turned out to be a great success. The entertainment began at eight o'clock with a violin and piano duo. During the intermission a sale was held consisting of many twenty-five cent articles, donated by the ladies, and two complete meals. A mystery room caused much amusement among the young people. Such screams of terror as came from some of the girls really made shivers run up and down your main vertebrae. However, everyone came out with a smiling face. When the concert was completed, a lovely lunch was served and everyone returned home with the feeling that they had received much more than their money's worth. This is a feeling we all like to have nowadays.

The ladies are planning to entertain us again on the twenty-fourth of November. A dinner will be served at noon and will be followed by a concert which was announced as unusual. I am sure everyone will have a delightful time as on the previous occasion. Come and see.

C. A. Morris of Wataskiwin spent the week end at the home of Mr. and Mrs. E. Prichard.

Many of our Prague citizens attended the meeting held by Dr. Dobson in Strone on Monday evening. A banquet for men was held at six o'clock at which Dr. Dobson favored the men with a short talk.

Some of the boys of this community have already trapped as many as thirteen to twenty weasels. If they keep this up during the winter days they should make a little money before spring is here again.

The children of Prague announced some time ago that they had begun practicing for their Christmas concert. With such an early start the concert should be a great success.

## JOINT HOSTESSES

Viking, Nov. 17th.  
Mrs. Adolf Streit and Mrs. Lar Kelly were joint hostesses at a bridge party held at the home of Mrs. Streit on Tuesday evening. Prizes went to Mrs. F. Miller and Mrs. J. Asa, with Mrs. Runyon winning the lucky prize. Daily refreshments were served.

## WORLD HAPPENINGS BRIEFLY TOLD

Earl Fortescue, a former aide-de-camp to King George, is dead. He was 78 years old. Viscount Errington is heir to the title.

The British admiralty announces that the names of the eight destroyers of the 1931 program will be Echo, Eclipse, Electra, Encounter, Escapade, Escort, Esk and Express.

A piece of quartz picked up casually by a road worker, has started a small gold rush into the Fourth of July canyon, east of Coeur d'Alene, Idaho.

Six new schools to accommodate 8,440 pupils—made necessary chiefly by housing development at Becontree, Essex, England—were opened at Barking, a ceremony believed to be unique.

Rear-Admiral Edward Radcliffe Evans, whose career in the royal navy since 1867 has been marked with a rapid succession of promotions and distinguished services, is promoted vice-admiral.

Great Britain is pinning her hope of the world economic conference to be held at London for a solution of the world's problems, said Lord Reading, former Viceroy of India, addressing the British Empire Chamber of Commerce at New York.

Heroism which was responsible for the saving of 37 lives when the steamer "Walton" was wrecked on the coast of Nova Scotia on September 10, was recalled in London recently when Second Officer Herbert Mant was presented with the Lloyd's silver medal for life-saving at Lloyd's office.

George C. Smith, general traffic manager of the Missouri-Kansas-Texas Railway, believes thousands of Texans are no longer "train-conscious." He said a survey in several leading colleges disclosed 30 per cent of the students had never ridden a railroad train.

The secret, say delegates to the Illinois Association of Chiropractors, is out: Adam and Eve both had flat feet. "But," said one delegate, "the ancients were better off than the moderns. They suffered from foot trouble due mainly to poor circulation, which they couldn't help."

### London's Hospital For Poor

Was Result Of Vow Made By Pilgrim To Rome

St. Bartholomew's Hospital in London, England, was built as the result of a vow. Eight hundred years ago a courier named Rahere started on a pilgrimage to Rome. Becoming ill during the journey, he vowed to St. Bartholomew that if he were spared he would build a hospital for the poor. He recovered, and in due course the hospital was built, partly by his own hands. "Barts," by the way, is the only hospital within the City of London, and the Lord Mayor and Aldermen of the City, while holding office, automatically become governors.

### The Bright Side

You can always find some reason for looking on the bright side of things. For instance, we are as glad as glad can be that we are not the official office boy who had to announce that Premier Cheng Hsiao-Hsu of Manchukuo was in conference with Foreign Minister Hsieh Chieh-Tai.

At Colon, canal zone, the average rainfall is about 116 inches a year.

Farmers in Hungary are reported to be in serious financial condition.

### Canada Not Military State

Spends Very Little Per Capita For Defence Purposes

Miss Macphail to the contrary, Canada is not a military state, certainly cannot justly be accused of seeking a place in the sun through armed force.

The report of the Department of National Defence for the fiscal year to March 31, 1931, makes this very clear. In the personnel of the non-permanent militia at the end of this year were 51,257, or 4,000 fewer than in 1914. In the year there was spent on military affairs only \$1,221,945, or almost \$800,000 less than the bill of eighteen years ago. In 1914 there were 32,391 Canadians who had each 12 days of camp training. Last year 2,182 men had four days each. In the Canadian permanent forces are 3,703 men of all ranks.

Those who can vision in these significant figures a picture of a nation bent on conquest, on military glory, have not the least trouble in seeing a school cadet corps as a class in blood-thirstiness. Few nations in the world spend as little per head of population for defence purposes as this Dominion, and when general armament comes down to the Canadian level we can imagine that the world has reached that happy state where wars and rumors of wars will have ceased.—Ottawa Journal.

### Facts About Big Liner

Empress Of Britain Equal To De Luxe Hotel

The "Empress of Britain" burns fifteen tons of crude oil in its engines every hour; its four screws are driven by steel shafts 26 inches in diameter by four turbine oil engines; its engine room is an immense power plant; the ship has 850 miles of electric wiring; there are separate cold rooms for butter, fruit, meat, vegetables, milk, canned goods, cereals, tobacco; its laundry goes night and day; it has 4,500 lights in the first class dining room alone, and there are several dining rooms; its swimming pool is heated; all the cooking except meat is done by electricity; there is hot and cold water in every room; there are separate rooms for baking pastries, bread, cooking vegetables, making ice cream, etc., etc. The vast culinary department is complete down to an electric egg cooker and an automobile machine which checks the time of every dish and records it in case there is complaint. The ship is a vast organization, over which every man is held responsible either by supervision or machine for his work. It works out like a Swiss watch. From the greenhouse to the bridge the system seems foolproof. Nothing is left to chance—not even the billing of an egg.

### When Windows Were Taxed

Levy Introduced During Reign Of William The Third

Bricked-in windows in many of the old houses in England are a reminder of the time when all windows were taxed. The tax was introduced in the reign of William III, in order to defray the cost of the recoinage of silver. Many people objected to paying the tax, and it was to lessen the amount which could be demanded that they caused some of their windows to be bricked-in. The tax remained in existence until 1851, when it was replaced by the inhabited house duty.

The earliest known mechanical toy dates back, about 2000 B.C., and is of Egyptian origin.

## Palpitation of the Heart Nerves Bad - Could Not Sleep

Mrs. Fred Bingham, Swift Current, Sask., writes:—"I was bothered with palpitation of the heart, and my nerves were so bad I could not sleep. I was getting desperate and confided my trouble to a friend who recommended me to use Milburn's Heart and Nerve Pills. I purchased a box and got such relief I would gladly recommend them to all who are troubled as I was."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

### Value Of The League

Has Accomplished Much In The Years Of Its Existence

We have had the League of Nations only a few years now, and in that short time it has done much. It has bound up some wounds of the past war, cured some ills of the present, and prevented some evils for the future. It cannot attempt everything all at once—to give peace in twelve years to a planet which has been distracted by war for more than double that number of centuries. It can only attempt what a sufficient number of its supporters want it to attempt. The real danger in this crisis in its affairs is not of too slow progress but of its falling back through lassitude and ignorance on the part of Governments and peoples into a state where nobody cares whether it lives or dies. That must not be, the world would have no use for an apologetic survival, lingering on like a Holy Roman Empire or a Holy Alliance long after the life had left it.—Manchester Guardian.

### Woman Acted As Minister

Took Charge For Month Of American Legation At Stockholm

The United States had a woman acting as its Minister to a foreign capital for the first time. Miss Frances Elizabeth Willis, third secretary, headed the American Legation at Stockholm during a month's absence of Minister John M. McCreath. Military, naval and commercial attaches, as well as a Consul-General and Consul, reported to her. There is no first secretary and the second secretary was absent. Miss Willis sent a cable that satisfied Secretary of State Stimson that she could fill the job. "The Minister left last night; I have assumed charge?"—Christian Science Monitor.

WHAT NEW YORK IS WEARING  
 (By Helen Williams)  
 Illustrated Dressmaking Lesson  
 Furnished With Every Pattern

A trim smart looking dress is this and one that could easily be worn for dress as well as school. It depends entirely upon the material used to fashion it. For school, it's distinctive and practical made of a wine-red wool crepe. The tie can be of white rough crepe silk or of white pique, and attached to the neckline so as to be readily removed for laundering.

Then again, it's just precious carried out in velvet for "best." Style No. 3181 is designed for sizes 11, 13, 15 and 17 years. Size 15 requires 3 yards 39-inch with 3/4 yard 39-inch contrasting. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### White Woman Plans

Hazardous Trip

Will Lead Expedition Into Land Of Head Hunters

The first white woman ever to invade the head hunters of Venezuela will lead a University of Arizona ethnology expedition this winter into the treacherous wilds of the Andes mountains.

Flaunting the traditions of her sex, Mrs. Ana Max McGrath plans to spend several months among three savage tribes. She expects to arrive on mule back in the land of the head hunters by December.

Mrs. McGrath will pierce into the mountain fastnesses of the Guajira Indians, who even today slash the heads of their enemies, and use a method similar to the pygmies of Africa to shrink and mummify the features. Seeking to discover whether the theory is true that the tribe migrated from Florida to South America, she will attempt to find their ancient cities and to trace back through artifacts their history. She will make motion pictures of her explorations.

While in Caracas, Mrs. McGrath will confer with Dr. Raphael Requena, noted authority on the South American Indians. The expedition will also have as an advisor Andre Manning, renowned Colombian archaeologist.

### Using Food For Fuel

Nebraska Planning To Heat School Buildings With Corn

Down in Brazil, recently, they were burning surplus stocks of coffee—just to get rid of it, as they do not need fires in that part of the world, except for cooking purposes. But out in Nebraska artificial heating is necessary during a good part of the year and the school commissioners in one district have decided to heat the court house and 62 school buildings under their jurisdiction with corn next year. They figure it will provide a ready market for the farmers' surplus crop and, perhaps save the country some money at the same time. They estimate they can purchase corn, still on the cob, at \$8 per ton, while coal costs \$12 a ton.—Moncton Times.

Holland is pumping dry a large part of the famous Zuider Zee, so that the area can be used for farm lands.

### Imported Reading Matter

United States Magazines Brought Into Canada Number 1,821

Few tariff changes in recent times have led to as much discussion as the duties imposed by the Dominion last year on magazines and periodicals coming from the United States. Despite all the arguments, few people realize just how far-reaching is this question of imported reading matter.

Ask anyone to estimate how many different periodicals, exclusive of newspapers, are printed in the United States and offered for import into Canada. The probable answer would be, "Oh, two or three hundred."

The Department of National Revenue has issued an appraiser's bulletin, listing all these publications under their various duty rates according to the 1931 tariff. There are exactly 1,821.

On less than half of these is duty charged. Tabulated according to the various rates, they are as follows: Two cents per copy duty, 126. Five cents per copy duty, 416. Free of duty, 854.

15 cents per pound and not less than 15 cents per copy, 123. 15 cents per pound and not less than 35 cents ad valorem, 202. —Border Cities Star.

### The Prevalence Of Crime

Is Due To Human Greed And Disrespect For Authority

The Minneapolis Tribune says that, speaking to the conference on social work at the University farm, Judge Andrew Bruce of the Northwestern University Law School frankly laid today's crime prevalence to the over development of human greed, coupled with growing disrespect for constituted authority. Among other things, he said: "Men and women are jealous of each other. They are money mad. They have exalted the thing and the dollar above the idea and the ideal. In their mad scramble for wealth and for power, and for pleasure, they have forgotten reverence and have forgotten God. We are lawless, because we are irreverent. We are discontented, because we know no law and can brook no restraint."—Brandon Sun.

### How Orientals Do It

Japan Has Built and Delivered Warship To China

For a year undeciphered war between China and Japan has been going on, all the time in Manchuria and for two months in Shanghai.

But Japan has just delivered at Shanghai a first-class warship which she has been building for China since May, 1931. Japanese warships are in port and threatening action if the anti-Japanese boycott here does not cease and while a section of the Japanese fleet lies in the river at Shanghai the new Japan-built Chinese warship steams up-river and is taken over by the "enemy."

The new vessel is a destroyer of 3,000 tons, costing \$2,500,000, has a speed of 25 knots and represents an advanced type of naval craft. She is called the "Ninghai."

### Building Fast Car

Sir Malcolm Campbell is building a 1,000-horse-power automobile with which he intends to attempt to better his own world's record of 254 miles per hour. The car will be equipped with a Rolls Royce Schneider cup trophy engine similar to the ones used in setting the world's air speed record and is expected to reach 300 miles an hour.

There is no "L" in the Japanese language and no "R" in the Chinese, so John Chinamen say "All light!" and his Japanese enemy says "Aw right!"

### Smiths Badly Tangled

All Three In Court Case Are Named WILLIAMS

William Smith had an argument with William Smith and William Smith investigated for the police department.

Smith No. 1, a garage owner in Oakland, California, complained to Smith No. 3, a police inspector, that Smith No. 2, a truck driver, had threatened him when he demanded payment of a bill.

## NEW INVENTION DOES AWAY WITH COOKING ODORS

Even fish and cauliflower bow down to Canapar Cookery Parchment

BETTER, CHEAPER AND EASIER COOKING

Delicious as cauliflower, cabbage and certain other vegetables are, they have imposed a heavy penalty on people who fearfully cooked them. Not to mention those who had to suffer the odor without enjoying the finished product. The same thing is equally true of fish.

Canapar Cookery Parchment, a very ingenious invention, does away with this annoyance entirely. While sealing in odors, it also retains flavor and food value. Cooking in Canapar actually parallels the famous French method of simmering and confounding food and its flavor in the closed casserole.

You buy Canapar in a large envelope of handy-size sheets which may be rinsed out and used over and over again because they won't absorb odors. When boiling vegetables you simply wet the Canapar and make a bag similar to a pudding bag. If you steam them, you line the steamer with Canapar, arrange food and seasoning, and fold back corners of the Canapar to prevent steam from dripping back. You can actually cook three vegetables at once in the same saucepan, this way—save fuel—and the flavors will not intermingle.

Steamed, or boiled, fish comes out firm, solid and swimming in its own juice. No odours. No sticky steamer or saucepan to clean up afterwards.

Line your roasting pan with Canapar, then the fats and juice can't burn. Meat is more succulent and there is no scouring or scraping of the pan afterwards.

Many women use Canapar for a dish cloth—it is so silky and satisfactory, and doesn't spread lint.

You'll never be without Canapar once you start using it. It saves time and money. Made by the makers of the famous PARASANI Heavy Wax Paper in the Green Box.

Special Offer  
 Most grocers, druggists and department stores sell Canapar, but if yours doesn't, just send the coupon and we'll give you a new and unique book entitled "Leftovers" containing one hundred recipes as a bonus for your trouble.

Applied Paper Products, Ltd., Hamilton, Ontario.

### THE HOUSE OF DREAMS-COME-TRUE

—BY—  
**MARGARET FIEDLER**  
Author of  
"The Splendid Folly," "The Hermit  
Of Far End,"  
Hodder & Stoughton, Ltd., London.

#### CHAPTER XXXVI.—Continued.

With a little inarticulate cry she ran to him—to the place that was hers, now and for all time, against his heart—and his arms, that had been so long empty, held her as though he would never let her go. "Beloved of my heart!" he murmured. "Oh, my sweet—my sweet!" They spoke but little. Only those foolish, tender words that seem so meaningless to those who are not lovers but which are pearls strung on a thread of gold to those who love—a rosary of memory which will be theirs to keep and tell again when the beloved voice that uttered them shall sound no more.

#### CHAPTER XXXVII.

##### "An House Not Made With Hands"

The landlord of the inn of the Green Dragon watched his two English visitors ride away up the steep road that led to Beirnefelds with unquestionable regret.

They had been lodging at the Green Dragon for the past fortnight, and he had discovered that English mildreds, whatever else they might be, were

not niggardly with their money. They required a good deal of attention, it is true, and had a strange, outlandish predilection for innumerable baths, demanding a quite unheard-of quantity of water for the same. And at all unlikely hours of the day, too—when returning from a ride or before going up to the castle to dine, mark you!

Still, they made no difficulty about paying—and paying handsomely—for all they wanted, and if a man chooses to spend his money upon the superfluous scrubbing of his epidermis, it is, after all, his own affair!

And now the two English mildreds were taking their departure from the village girls of weddings and the like. Apparently the Green Dragon's two eccentric visitors, not withstanding their altogether abnormal liking for soap and water, were much as most men in other respects and had lost their hearts to the two pretty English ladies living at the castle. So, no doubt, the "daughter of an English archduke, no less," was coming to Beirnefelds, at last, "Thank God for you, my sweet!"

It was ultimately settled that the whole party should remain at Beirnefelds until the latter end of June, when they would all return to England together and the two weddings should take place as soon as possible afterwards.

"But we won't have a double wedding," declared Jean. "It's always supposed to be unlucky."

"Do you believe in good and bad luck, then?" asked Lady Anne, smiling.

"I don't know," Jean answered seriously. "But it's always just as well to be on the safe side. Anyway, we won't tempt Fate by running unnecessary risks!"

"Besides, madonna," added Nick, "in the excitement of the moment we might get mixed and the parson hitch us up to the wrong people. The average nerve-strain attendant upon the role of bridegroom will be quite sufficient for me, thank you, without the added uncertainty as to whether I'm getting tied up to the right woman or not."

So spring lengthened out into summer, and, as the heat increased, bathing and swimming on the big lake that nestled in a basin of the hills were added to the long rides and excursions with which they whiled away the pleasant, sunshiny days.

Ever afterwards, the memory of those tranquil months at Beirnefelds would linger in the minds of those who shared them as something rare and precious. It was as though for this little span of time, passed so far away from the noise and bustle of the big world, they had pulled their barges out of the busy fairway of the river and moored it in some quiet, shady backwater. Then, when they were rested and refreshed, they would be ready to face anew, with fresh strength and courage, the difficulties and dangers of mid-stream.

"I'm sorry it's so nearly over—this long, long holiday of ours," said Jean regretfully. "The only thing that reconciles me to the fact is that after we're married Blaise and I propose to spend at least six months out of every year at Beirnefelds."

(To Be Continued.)

might be expected to bring her future husband.

There was no question that Lady Anne was certainly coming post haste—in reply to a series of joyful and imperative telegrams demanding that she should pack up and come to Beirnefelds immediately—"for we are all enjoying ourselves far too much to return to England at present," as Nick wired her with an iniquitous disregard for the cost per word of foreign telegrams. And Lady Anne, who always considered money well-spent if it purchased happiness, proceeded to wire back with equal extravagance that she was delighted to hear it and that she and her maid would start at once.

It was a very happy party that gathered round the table in the great dining-hall at Beirnefelds on the night of Lady Anne's arrival, and beneath all the surface laughter and gaiety lay the deep, quiet thanksgiving that only comes to those who have emerged out of the night of darkness and sorrow into a glorious sunlight of happiness and hope.

After dinner, in the soft, candle-lit dusk—for Peterson had never introduced the garish anomaly of electric light into the ancient castle—Jean sang to them in that quaintly appealing, husky voice of hers, simple tender folk-songs of the countryside, and finally, at a murmured request from Blaise, she gave them "The House Of Dreams."

It's a strange road leads to the House of Dreams.

To the House of Dreams-Come-True, its hills are steep and its valleys deep, And salt with tears the Wayfarers weep.

The Wayfarers—I and you But there's sure a way to the House of Dreams.

To the House of Dreams-Come-True, We shall find it yet, ere the sun has set.

If we fare straight on, come fine, come wet.

The Wayfarers—I and you.

As the last words died away in silence, she looked up and met Blaise's eyes. He was leaning against the piano, looking down at her with a tranquil happiness in his gaze.

"Our House of Dreams-Come-True, Jean, at last," he said softly. She met his glance with one of utter trust.

"And we needn't ever fear, now, that it will tumble down. But, oh! Blaise, if we had built on a rotten foundation, we should never have felt safe—not safe like this!"

"No. You were right, belovedest—as you always have been, always will be." Then, very low, so that none but she should hear: "Thank God for you, my sweet!"

#### These Pies Are New

Very Easily Digested Because Simple Ingredients Are Used

Since the principal ingredients of these pies are sweetened condensed milk, graham crackers and lemon juice they are very easily digested.

#### PEACH CREAM PIE\*

1½ cups (1 can) Eagle Brand Sweetened Condensed Milk.  
1 cup lemon juice.  
1 cup sliced peaches.  
½ cup whipping cream.  
2 tablespoons confectioners' (4x) sugar.

Chocolate Wafer Pie Crust. Blend together Eagle Brand Sweetened Condensed Milk and lemon juice. Fold in sliced peaches. Pour into nine-inch pie plate lined with Chocolate Wafer Crust. Cover with whipped cream sweetened with confectioners' sugar. Chill before serving.

#### CHOCOLATE WAFER PIE CRUST

Roll enough chocolate wafers to make ¾ cup of crumbs. Cut enough chocolate wafers into halves to stand around the edge of pie plate. Cover bottom of plate with crumbs and fill in cavities between wafers. Pour in filling as usual.

It is possible to use apricots in place of peaches in the above recipes.

## Relieve that pain safely

You can always relieve that ache or pain harmoniously with Aspirin. Even those deep-seated pains that make a man's very bones ache. Even the systemic pains so many women suffer. They will yield to these tablets! Aspirin has many important uses. Read the proven directions in every package; and don't endure any needless pains from neuralgia, neuritis, rheumatism.

Keep a bottle of these tablets in the house; carry the pocket tin if subject to unexpected headaches, sudden colds. Quick relief, without any harmful effects; Aspirin does not depress the heart. Just look each time for the name Aspirin—and the word genuine printed in red on every box.

Every druggist has Aspirin, and if you ask for it by that name you are sure to get relief. "Aspirin" is a trade-mark registered in Canada.

#### Paris Overcomes Noise

Has Become One Of Most Silent Cities At Night

One of the noisiest cities in the world by day, Paris has become by night one of the most silent, owing to the relations war against "bruits nocturnes" waged by the police. When a decree proscribing various unnecessary noises was announced it aroused general derision. Yet, in spite of the great activity in Paris at night, the degree of silence achieved is a tribute to the success of the police. A list of the proceedings taken during a period of eight weeks shows that almost every possible kind of offense has been committed detected and punished. Of the 889 cases in which action was taken the majority were against motorists for use of the horn during prohibited hours.

Douglas' Egyptian Liniment should be in every household. Stops bleeding at once, cauterizes wounds and prevents blood poisoning. Keeps away inflammation and proud flesh.

### THE RHYMING OPTIMIST

By Aline Michaels

#### GODS

Oh, the god that one man worships is a thing of wood and jade. With topaz eyes and ivory hands And feet, grotesquely made!

And the God another kneels to Walks unseen, where candles bloom And the incense slowly rises Through a lofty, vaulted room.

But the God who gives the courage For the conflict, day by day, Is the God who keeps beside me Wherever I may stray.

Oh, my God is farther distant Than the idol, strangely dressed, Yet my God is nearer to me Than the heart within my breast!

For I find Him in the heavens And in every starry land, And I find Him in the rosebud That is lying in my hand!

#### For Roads Commission

Recommend Federal Body To Work In Harmony With Provincial Highway Commission

A federal commission to work in harmony with proposed provincial highway commissions was recommended at the concluding session of the western division, Canadian Automobile Association convention, Calgary, when officers were elected and a heavy business agenda completed.

A. B. Mackay, Calgary, was re-elected president and A. C. Emmett, Winnipeg, was again named secretary. Both officials have held the same offices since the western division organized four years ago.

#### Little Helps For This Week

"For this is the message that we heard from the beginning, that we should love one another."—1 John 3:2. Be useful where thou livest, that they may. Both want and wish thy pleasing presence still. Find out men's wants and will, And meet them there. All worldly joys are less To the one joy of doing kindnesses. —G. Herbert.

Small kindnesses, small courtesies, small considerations habitually practised in our social intercourse, give a greater charm to the character than the display of great talents and accomplishments.—M. A. Kelly.

Let the weakest, let the humblest remember that in his daily course he can, if he will, shed around him almost a heaven. Are not kindly words almost the staple of our daily happiness? From hour to hour, from moment to moment, we are supported, blessed, by small kindnesses.—F. W. Robertson.

Asthma No Longer Dreaded. The dread of renewed attacks from asthma has no hold upon those who have learned to rely upon Dr. J. D. Kellogg's Asthma Remedy. So safe do they feel that complete reliance is placed on this true specific with the certainty that it will always do all that its makers claim. If you have not yet learned how safe you are with this preparation at hand get it today and know for yourself.

Bigger Face But Shorter Hands London's largest clock, installed in a new commercial building, has a face two and a half feet larger than that of Big Ben, but its hands are shorter than those of the older clock.

You may be a fine, upstanding citizen, but that doesn't make any difference to a banana skin.

Try COFFEE this Way!

ONCE YOU meet Andrew Borden's St. Charles Milk in your coffee, you will never again be without it in the house. It blends in smoothly, turning coffee to a rich golden brown, and has a rich lattico that makes one come back for more.

ST. CHARLES MILK  
UNSWEETENED EVAPORATED

## TOO MUCH ACID

Made in Canada

The right anti-acid offsets the harm otherwise done by excessive eating, drinking, and constant smoking, anything causing an acid condition. When "sunk" from such indulgences, Phillips' Milk of Magnesia "ill always straighten you out. A joy and comfort to hearty eaters, constant smokers. Get the genuine; substitutes don't act the same.

ALSO IN TABLET FORM, Phillips' Milk of Magnesia Tablets are now on sale at drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

**WEEDS**

The tremendous importance attached to the use of clean seed grain is brought home with particular emphasis in two bulletins recently issued by a committee of the National Research Council which has been investigating the weed problem in the prairie provinces during the past three years. Starting losses have been incurred annually due to the inroads made by this type of pest and investigation has shown that the main factor in the dissemination of the weeds has been the seed grain itself. Birds, animals and itinerant farm machinery play a certain part in the spreading of the plague but it is a very minor one.

It has been shown that the wheat yield in badly weed infested areas has been reduced as much as 44 per cent due to the loss of moisture and shading of productive plants. A conservative estimate of the average loss from this source in the prairie provinces during the course of a crop year is placed at 18 per cent. This, even with present grain prices prevailing amounts to a matter of \$40,000,000. Over and above this is the cost of combating the menace and the expense of harvesting, threshing, handling and shipping the unwelcome seed along with the grain.

The latter item is no minor one. Statisticians have shown that the weed seed that travelled to the head of the lakes at the farmers' expense during the three crop years previous to 1928 would have required 96 trains of 60 cars each had it been shipped as an individual consignment. Dockage

accounted for 271,558,454 pounds of the grain that reached the terminals in 1929.

How serious the problem and how vital the need may be gathered from the fact that of the seven most destructive weeds under investigation only one, poverty weed, is native to the west. The others have been introduced in shipments of grain distributed in connection with government relief schemes or brought in by farmers and contractors. Stinkweed has not been content to spread its unpleasant presence across the farming sections but, travelling with dirty grain used in the feeding of sleigh dogs, has left a path practically to the Arctic coast.

Figures compiled by the United States Department of Agriculture reveal annual losses of \$5,000,000,000 from various crop afflictions in that country—all of which are removable. The weed monopolized three-fifths of the discredit for that destruction, outstripping the combined efforts of animal and plant diseases and damaging insects. It is natural to assume that the same condition exists largely in Canada.

The committee has already issued suggestions as to controlling the scourge. With the annual weed the prevention of seeding is the main point advanced. Tillage methods are offered to combat the perennial. The work of the body has really just commenced, however. It is a tremendous problem with which they are grappling, offering an opportunity for an equally tremendous saving to the country.—Edmonton Journal.

**Main Street NOTES OF INTEREST OF BUSY KINSELLA**

Miss Edie Allen who has been assisting at the Nu-Way store for the past year, left Wednesday for her home in Alliance.

H. W. Love was in Irma on business Wednesday and Thursday.

Miss Dorothy Drummond spent the week end in Irma. Dorothy says she is enjoying her college work and is anxious to finish her course.

Mr. and Mrs. P. J. Hardy of Edmonton, drove down on Friday, returning on Monday morning.

Mrs. James Fenton received word on Monday that she has another grand-daughter, at the home of Mr. and Mrs. Ralph Dunlop. Mrs. Dunlop is in the Lamont hospital and she and her baby girl are doing nicely.

A very pleasant evening was spent at the home of Mr. and Mrs. Engr Sr. when about thirty young people of the Crescent Hill district enjoyed themselves with whist and music. The lucky score was won by Miss Edith Fitzpatrick and Mr. Gordon Fenton. While Miss Ester and Mr. Ralph King came in for the consolation. A delightful lunch brought the evening to a close.

There will be a dance at Avonlea school on Friday, November 25, for the purpose of raising Christmas Tree funds. The music will be furnished by Coulman's orchestra. Gentlemen, 50 cents. Ladies please bring lunch.

**THINKS TARIFF IS WRONG**

November 7, 1932.

Sir—I think our system of tariff is the cause of the low price of farm products. Our tariff works to the profit of our manufacturers, to the loss of the foreign manufacturer, who exports to us of a domestic product. Naturally when we don't let foreign goods in, we make any money on their exports they are not going to pay us a discount price for our exports. We are trying to starve the foreigners and then we grumble because they won't pay us a big price for our exports. We have to import as much as we export so why not let our customers make a decent living instead of trying to starve them?

Our manufacturers can protect themselves without taxing imports, they can limit the imports and spread them over all manufactured articles and only let each country import as much as they buy from us. By this plan the countries that export to us will pay the tariff to buy our exports, also they could pay more for our exports because their manufacturers would be able to pay the tariff on their own and cut down unemployment.

This plan will not make goods cost more to the farmer nor will it hurt the manufacturer's business, but will give the foreign manufacturer the profit he is entitled to have, instead of our government taking it away from them.

If my idea is right, I think farmers should get their members of parliament busy and see if something can't be done. If the government will not do anything a boycott on goods "made in Canada" might bring results. Also if the farmers gave the government notice to discontinue all services which taxes bring it would be interesting to see if the government could force the farmers to pay for something they don't want. I don't think such drastic steps will be necessary but it would be well to lay all the cards on the table.

I would like you to print this letter if you think it is worth printing.

Yours truly,

C. J. A. AXELSON.

**Fuse Blowing Causes**

Change of Program

Owing to a fuse being burned out Sunday evening, the Young Peoples' program was altered. Lantern slides were arranged for the evening, but instead our president arranged for transportation to the social evening at the home of H. Fenton. We also had a very interesting speech from Dr. Dobson and Rev. Mr. Gibson.

We were well pleased with the attendance though, and hope that none of our young people will be discouraged and stay home next Sunday evening. Mr. Marshall in charge and we know he'll have a good meeting planned for us all.

**Wastepaper Basket**

"My mission in life is to save young men," remarked an evangelist at St. Paul when introduced to an old maid. "Well, I wish you'd save one for me," the old maid replied.

"She is just temperamental," said one lady to another about one of the social lights in a neighboring town. "Yes, ninety per cent temper and ten per cent mental," was the reply.

Heard at the ladies' social: "Did you catch your husband flirting?" "Of course. Waa'n't that how you caught yours?"

"I feel like thirty cents," remarked a high school boy in the library to one of the girls yesterday morning. "Well, that would indicate that things are getting higher than they used to be," she replied.
